--------------	----------

fetch_adform	<i>fetch_adform</i> A function to fetch Amazon Ads data from the windsor.ai API
--------------	---

Description

fetch_adform A function to fetch Amazon Ads data from the windsor.ai API

Usage

```
fetch_adform(  
  api_key,  
  date_from = NULL,  
  date_to = NULL,  
  fields = c("campaign", "clicks", "spend", "impressions", "date")  
)
```

Arguments

api_key	Your api key to access Windsor.ai API
date_from	The date from which to start getting data in format YYYY-MM-DD
date_to	The date until which to start getting data in format YYYY-MM-DD
fields	he fields fetched from the API for a given connector See https://windsor.ai/api-fields/ for details.

Value

A data frame with the desired data

Examples

```
## Not run:  
my_adform_data <- fetch_adform(api_key = "your api key",  
  date_from = "2022-10-01",  
  date_to = "2022-10-02",  
  fields = c("campaign", "clicks",  
    "spend", "impressions", "date"))  
  
## End(Not run)
```

my_adform_data	<i>Sample of digital marketing data from Adform downloaded by means of the Windsor.ai API.</i>
----------------	--

Description

A dataset containing sample Adform data fetched from windsor.ai API. See more at: <https://windsor.ai/>
